PROOF that vaccine antibodies and the graphene **transfers to the UNvaccinated** through the air, by breathing the air exhaled by the person 3 feet away.

The image shows a hand holding a printed article. The article's title is "New Study & Confidential Pfizer Documents confirm mRNA 'Vaccine Shedding' has been occurring with shockingly dangerous consequences". The byline is "By The Exposé" and the date is "July 29, 2023". The article text states: "A study conducted by scientists at the University of Colorado confirms the vast majority of humanity has had absolutely no choice in the matter of whether they wish to get the Covid-19 injection or not because the vaccinated have been transmitting antibodies generated by the injections through aerosols. The findings should however come as no surprise because a confidential Pfizer document had already confirmed exposure to the mRNA injections was perfectly possible by skin-to-skin contact and breathing the same air as someone who had been given the Covid-19 jab. They also, unfortunately, add weight to the claims made by Dr Phillippe van Welbergen, who demonstrated that graphene, an alleged undisclosed ingredient of the Covid-19 injections, is being transmitted from the vaccinated to the not-vaccinated and destroying red blood cells and causing dangerous blood clots." Below the article is a promotional message: "Let's not lose touch... Your Government and Big Tech are actively trying to censor the information reported by The Exposé to serve their own needs.
